# Woodgrain Slat System

Want the rustic look of Western Red Cedar timber slats without the ongoing maintenance? Throw away your paintbrush because we have the solution for you! Let us supply you with all the materials you require to add rustic appeal and warm contrast to your home. They can be assembled to any size or spacing you like and come in either 65ml or 100ml width slats. The only limitation is your imagination!

**Step 1 -** Set the U shaped mounting channel at desired panel finish height and fix to posts with supplied fasteners.
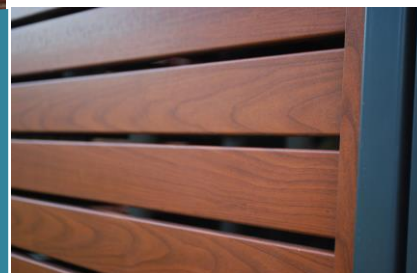

**Step 2 -** Slide 1st horizontal slat into channels, lining up the base with the bottom of the mounting channel and fix with supplied fasteners.

**Step 3 -** Using the supplied temporary spacers, continue to stack & fix the remainder of the slats until your desired panel height is achieved. (Hold the slat down on the spacer as you fix to maintain the correct spacing)

**Step 4 -** Click the cover strip into place on the mounting channel to conceal fastenings.

## PANEL DETAILS

- Choose from two different Slat widths 65ml or 100ml
